

IBM awards Danfoss Drives for outstanding innovation

IBM Denmark has awarded Danfoss Drives with the Software Innovation Prize for our innovative ideas and activities through automating manual processes and strengthening the development creative product design by means of a software product line.

"This distinction recognises that the Danish software industry has seen and respects our innovation. It has been a long, hard and challenging journey to reach the present status of Danfoss Drives software product line. We are now looking forward to seeing the effect of the quality and productivity initiatives with all its automated elements" says Flemming Klovborg, Director of Embedded Software Development in Danfoss Drives.

As part of the distinction Danfoss Drives received a sculpture by the Danish artist Jens Galschiøt.
